### Alerting Abstract JP A

NOVELTY - When user requires a service list, a web browser (10) transmits a request signal to a web server (11). When the request signal is transmitted, the user's ID stored in a memory is read based on which the service list stored in a database (13) is chosen and then displayed on a display control unit (14).

USE - For displaying various service lists to internet user.

ADVANTAGE - Desired service list is displayed, since it is selected based on user ID.

DESCRIPTION OF DRAWINGS - The figure shows the block diagram of service list display device.

- 10 Web browser
- 11 Web server
- 13 Database
- 14 Display control unit
